**Here's what's new today in the Horizon AI**

- Google's Imagen 2 Expands Capabilities with Text-to-Live and Image Editing 🎨
- Meta to Release Smaller Versions of Llama 3 Before Major Model Debut
- AI Tutorial: Create Mind Maps in seconds with AI
- AI Tools to check out
- The Latest in AI and Tech 💡

## AI News

GOOGLE

### Google's Imagen 2 Expands Capabilities with Text-to-Live and Image Editing 🎨

Source: Google

Google [has announced](#) several exciting updates to its Imagen 2 image generative model. The latest advancements include the introduction of text-to-live capabilities allowing users to transform text prompts into animated images, as well as the general availability of advanced image editing features.

**Details:**

- Imagen 2 now offers text-to-live functionality, generating animated images equivalent to animated GIFs with a resolution of 360x640 pixels and a duration of four seconds at 24 frames per second.
- Google plans to continuously enhance the text-to-live capabilities, including the ability to create images using a variety of camera angles and motions while maintaining consistency throughout the sequence.
- The newly available image editing features include inpainting (adding or removing elements from a photo), and outpainting (expanding the borders of an image).

Imagen 2 was launched in 2023 and is positioned to compete with OpenAI's DALL-E, Midjourney, and Adobe's Firefly. Users can try Imagen 2 by signing up for a [free Google Cloud account](#) and accessing it through the Vertex AI suite.

## TOGETHER WITH RYSE

**INVEST IN THE FINAL PIECE  
OF THE SMART HOME**

## Missed out on Ring and Nest? Don't let RYSE slip away!

**Ring** — Acquired by Amazon for **\$1.2B**

**Nest** — Acquired by Google for **\$3.2B**

If you missed out on these spectacular early investments in the Smart Home space, here's your chance to grab hold of the next one.

[RYSE](#) is a tech firm poised to dominate the Smart Shades market (growing at an astonishing 55% annually), and their [public offering of shares priced at just \\$1.50](#) has opened.

They have generated [over 20X growth in share price](#) for early shareholders, with significant upside remaining as they just launched in over **100 Best Buy stores**.

Retail distribution was the main driver behind the acquisitions of both **Ring** and **Nest**, and their exclusive deal with Best Buy puts them in pole position to dominate this burgeoning industry.

[Secure your stake before the offer closes.](#)

### META

## Meta to Release Smaller Versions of Llama 3 Before Major Model Debut

According to a Meta employee, Meta plans to release two smaller versions of its Llama model next week, in order to build anticipation for the major release of

Llama 3 scheduled for this summer.

**Details:**

- The smaller models will specialize in text generation, while the larger Llama 3 model will be multimodal, capable of generating images and answering questions about images.
- The full Llama 3 model is expected to have around 140 billion parameters potentially twice the size of the previous Llama 2 model, as Meta aims to catch up to OpenAI's GPT-4.
- In recent months, the Meta team has worked to make Llama 3 more open to answering controversial questions, with the goal of providing more context and responsiveness to users.

Meta's [investment](#) in AI has intensified, with the company planning to have about 600,000 graphics cards in use for AI training by the end of the year. These new open-source models will showcase the results of that investment.

## AI Tutorial

### Create Mind Maps in seconds with AI

You can build mind maps in seconds by leveraging AI. Here's one way to do it:

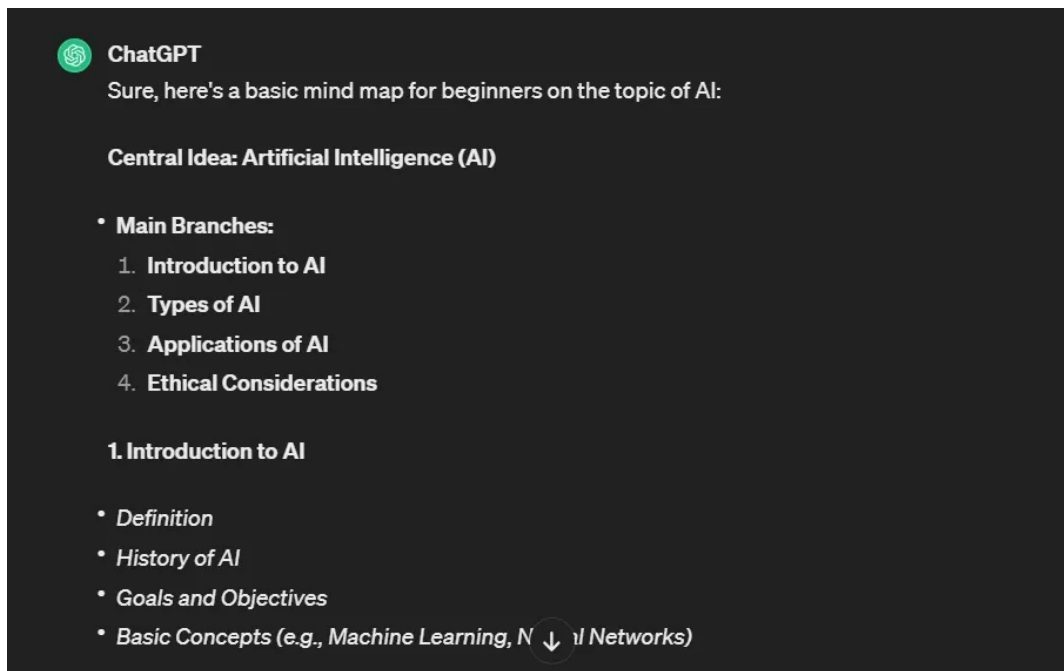

1. Go to [ChatGPT](#) and use this prompt:

“Create a mind map of [Your Topic]. List topics as central ideas, main branches, and sub-branches.”

You

Create a mind map of AI for beginners. List topics as central ideas, main branches, and sub-branches

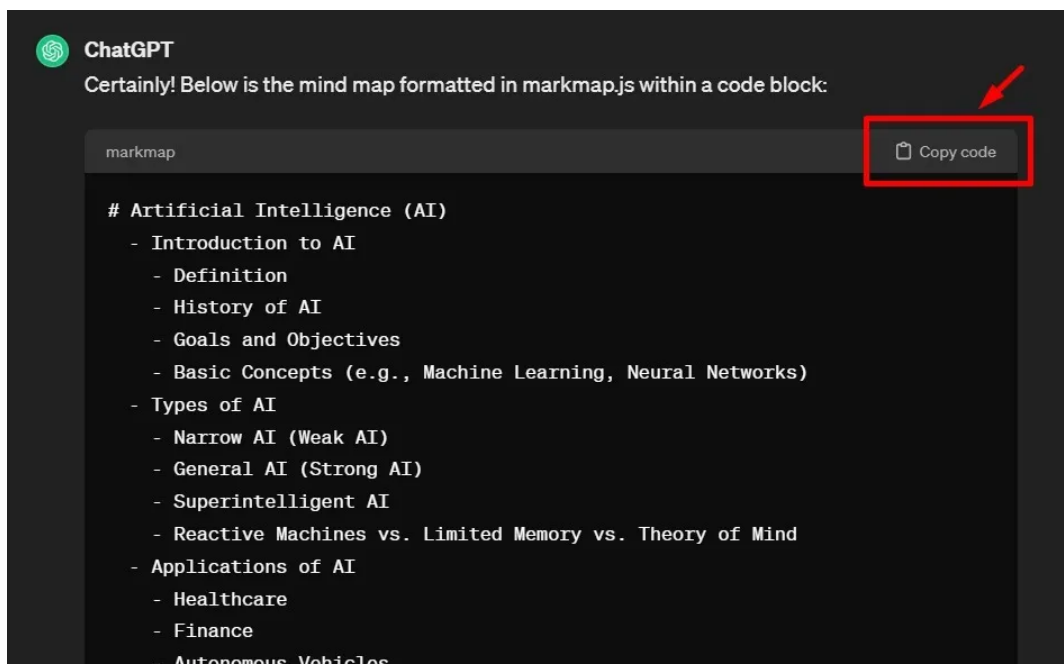

## 2. Transforming Text into Structure

Ask It to create a mind map in markdown format.

If ChatGPT does not send you your result in a code box like this, send this prompt  
“Send me that again in markmap.js formatting inside the code box”

Then click on **Copy code**

(You can also make the changes you want to the information or structure, that's the advantage of having the code.)

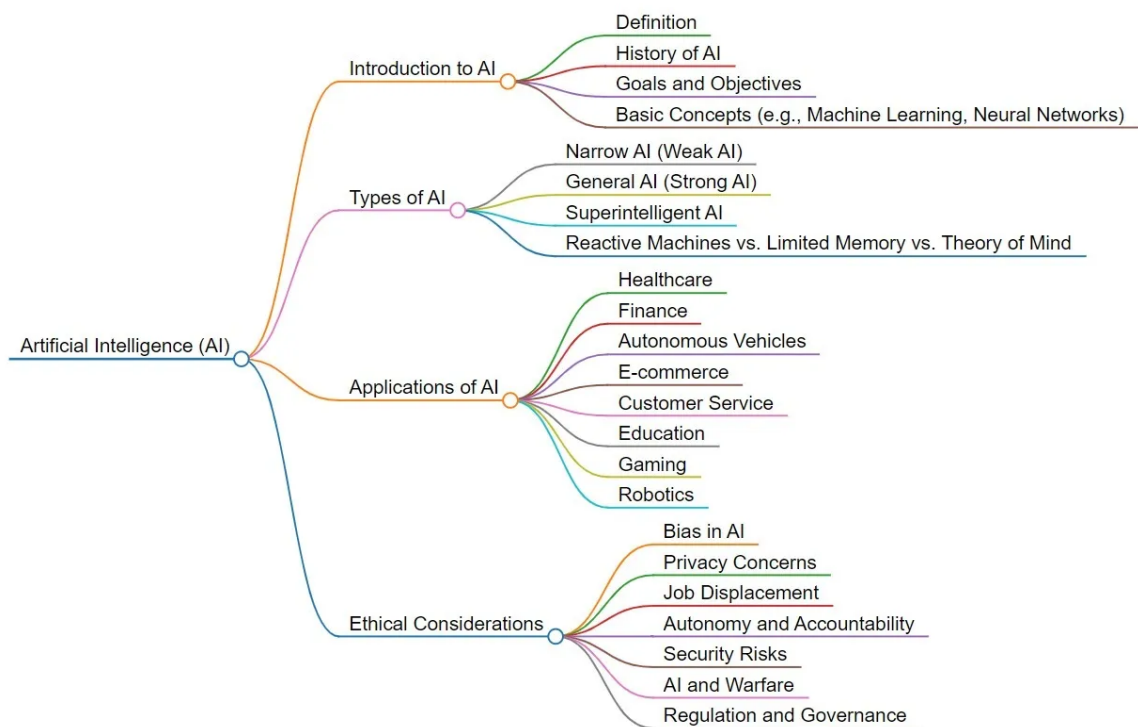

- E-commerce
- Customer Service
- Education

### 3. Visualise with MarkMap

Go to [MarkMap](#) and copy and paste your markdown output from chatGPT into the MarkMap editor.

After finishing, download it as an interactive HTML for online use or as an SVG file pictures.

## AI Tools to check out

[Heydai](#): Daily planner & time tracker with a touch of AI.

[Civitai](#): Powerful art generation tool that uses Stable Diffusion to create art images.

[Genie AI](#): Secure AI data analyst, utilizing Gen-ai-SQL to automate complex

queries for instant data insights.

**Pika:** Free AI video generator

**Clearword:** Real-time AI meeting assistant that creates summary notes and completes actions live during your calls.

## The latest in AI and Tech

### [Musk says Grok 2.0 will surpass GPT-4 by May](#)

In a recent interview, Elon Musk stated that his AI company, xAI, is developing a second version of its Grok model, which is expected to exceed the capabilities of GPT-4 by May 2024. While xAI's Grok 1.5 faced difficulties keeping up with leading AI models, Musk expressed confidence in the upcoming Grok 2.0. He also ventured to make a prediction, stating that AI will surpass the intelligence of the smartest human by next year.
